

THE FAIR AT NIGHT.

Lights of Changing Hues Will Flood the St. Louis Picture.

Electric Effects are Combined with Other Ingenious Contrivances in Revealing Beauty of the World's Fair in Her Robe of Darkness.

The night effects of the Exposition will be a symphony in color. The exhibit buildings will be bathed in a pure white light, which will bring out into strong relief their beautiful outlines and the richness of the tints and mural paintings on their screen walls.

Chief Henry Rustin, who is head of the department of electrical design, has charge of this important feature. Acting in the same capacity at Omaha and Buffalo, he set so high a standard there that his effort to outdo it at St. Louis is the supreme one of his life.

By ingeniously contrived lights the whole picture will be flooded at night with changing hues. At one time the scene will be a harmony of violet, changing into amber, emerald, crimson and amethyst, running the whole gamut of color combinations so skillfully that the spectator hardly will be conscious where one color leaves off and the other begins. But through all the changes of colors thrown on the buildings it will be possible for the cascades to retain a distinctive tint.

Mercury vapor lamps are cleverly concealed in the bases of the sculpture, lining the sides of the cascades, the rays being thrown from concealed reflectors through small windows at an angle that will not meet the vision of spectators from any point of view. In this light the waters of the cascades will have the appearance at one time of a ghostly phosphorescent torrent, at another moment of floods of opal gems and again of a cataract of living flame.

Every source of the wonderful kaleidoscopic effects will be ingeniously hidden. It will be possible to pick out different parts of the hill and its structures in different colors. Thus while the hall in the center will be a rose color, one arm of the colonnade orange, the other violet and the twin pavilions emerald, the whole splendid effect will be attained without confusion of colors.

The night effects on other parts of the site have not been forgotten. An electric fountain, that will be a thing of beauty and a riot of color, surpassing anything of the kind ever designed, will occupy a point of vantage on the grounds. The exhibit buildings at night will appear to be giant cornices of white light supported at the four corners and the centers by immense pavilions of light. The rest of the facades will be so treated that their massive columns will be silhouetted against the screen walls which will be banks of blazing white light.

PATENT EXHIBIT AT FAIR.

The United States Is to Show Some Interesting Models of Early Inventions.

The exhibit of the United States Patent Office at the World's Fair will show a series of models designed to represent ideas that have made epochs in the industrial history of the world. So far as possible, the first thing of its kind in every line of human invention will be shown. For instance, visitors will have an opportunity to see the actual sewing machine which was the first practical contrivance of its kind ever constructed. It was patented in 1846 by Elias Howe. Previously, in 1812, J. J. Greenough had obtained a patent for a sewing machine, which carried the cloth along automatically, having a needle with a hole in the middle.

Equally interesting in its way is the earliest typewriter, which was patented by C. Thurber in 1842. The type keys are set around the periphery of a horizontal brass wheel, and in order to print a letter it is merely necessary to punch one of the buttons, which causes the type to descend through a little tube and make a mark upon a slip of white paper.

The exhibit will include a model of the first cast-iron plow, which was patented by Charles Newbold in 1797, and the first screw propeller, which was invented by Robert Fulton in 1808. The invention of the steamboat is credited to Robert Fulton, yet in the seventeenth century Denis Papin launched on the Seine, in France, a boat that was run by steam. It is a matter of historical record that the river barge men smashed Papin's boat because they feared that it would injure their business.

The most interesting of all models, however, in the line of aquatics, will be that of Abraham Lincoln's famous device for lifting steamboats off shoals.

Another exhibit will be the first printing press and harvesting machine, the latter made in 1800 B. C. also will be shown with many other rare inventions.

Four Million Plants.

More than 4,000,000 flowering and foliage plants are required to fill the beds in the Cascades Gardens at the World's Fair. These plants were all propagated in the World's Fair greenhouses and are ready for transplanting.

Intra-Mural Railway Completed.

The intra-mural railway at the World's Fair is finished and after a test was found satisfactory. The visitor may board the cars at any station and reach any point of the Exposition for one fare.

It was the first pair of bed socks that Beth had ever seen.

"Goodness!" she exclaimed, surprised, "I wouldn't want to wear soft shelled socks." Judge.

"Did you ever take a chance in Wall street?"

"No," answered Mr. Ardine, "I put up my money several times. But I never got a chance."—Washington Star.

PUBLIC BENEFACTORS

It Is Not Necessary to Give Away Millions, as a Johnson City Man Proves.

There are other means Of public benefactors. One is to point out the path. That leads away from the cemetery. Here's a case in point:

F. P. Baxter, manager for the K. P. Jones Lumber Co., living on Walnut st., says: "For a long time, off and on, I was troubled with a backache, which at times became worse than an annoyance. The kidney secretions were frequent and unnatural. I used various remedies, but derived little or no benefit. Learning of Doan's Kidney Pills, I got a box at the store of Patton Drug Co., and have been greatly benefited by the few doses that I have taken, so far. The beneficial effects of the treatment have been so marked that I do not hesitate to recommend them to my friends." For sale by all dealers; price 50 cents a box. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States. Remember the name—Doan's—and take no other.

THE FASHIONS FOR SPRING.

Coats and skirts are now being made of the same material, but they are no longer fashioned upon lines of almost geometric severity. The newest material for these, and one that is rapidly coming forward is crepe de Chine. The spring coat may be made in any one of three distinct shapes; one is the short sack coat, loose and straight, which was seen last season; another is a modified Russian blouse, somewhat suggestive of the kimono; a third style is a plain, loose coat with a cape.

From present indications, two noteworthy features of the new gowns are likely to prevail. The more important is the ever-increasing vogue of the short skirt. The other is the frequent use of drapery across the front of the waist.

Too much importance cannot be given to the soft, sheer fabrics that lend themselves so rapidly to the graceful flowing lines of the season's modes. The voiles and veilings are, perhaps, in highest favor. Bordered materials in soft silk and cotton mixtures, sheer cottons and linen caucuses are among the popular novelties. A glint of gold is introduced in everything. Gold braid, buttons, cords, frogs and pendants are some of the forms of this military decoration. Laces that are fine and filmy are the choice of the moment. The colored cotton embroideries are among the novelties. There are lingerie frills and ruchings without number for the sleeves and neck of the fashionable gown, and buttons are conspicuous. From The Delineator for April.

"We have used Chamberlain's Colic, Cholera and Diarrhoea Remedy in our family for years," says Mrs. J. B. Cooke, of Nederland, Texas. "We have given it to all of our children. We have used other medicines for the same purpose, but have never found anything to equal Chamberlain's. If you will use it as directed, it will always cure." For sale by Horace Miller, Druggist.

"Try as would," exclaimed the eloquent pugilist, explaining his defeat, "I simply could not paste him."

Japan has informed Korea that the integrity and independence of the latter country will be maintained and that it will be granted a loan of 5,000,000 yens to assist its finance.

"I have been subject to sciatic rheumatism for years," says E. H. Waldron, of Wilton Junction, Iowa. "My joints were stiff and gave me much pain and discomfort. My joints would crack when I straightened up. I need Chamberlain's Pain Balm and have been thoroughly cured. Have not had a pain or ache from the old trouble for many months. It is certainly a most wonderful liniment." For sale by H. C. Miller, Druggist.

The government has sent W. A. Day assistant attorney general, with General Russell to look after the transfer of the Panama Canal title to the United States. It is stated that some anxiety in regard to this transfer exists in official circles.

Deafness Cannot be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running, scald or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out of this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & CO., Toledo, O. Sold by Druggists. The Hall's Catarrh Cure is the best.

The World quotes Samuel Untermyer as saying that he believes the Northern Securities decision restricts rather than enlarges the anti-trust act. He thinks that the anthracite roads and some industrial corporations might be brought under similar decisions. But he is confident that the same thing that happened in the case of the Standard Oil Trust will happen again in a different form in this case.
